Oh no! What have we done to our river? If we make our rivers dirty, where will we get clean water and healthy fish? Let us stop polluting our rivers; they are our source of life.

Thanks for keeping our rivers clean!
We can all enjoy and use our healthy river again. A healthy river produces healthy food and other benefits for us. The water from a healthy river is easier to purify before we use it. A healthy river provides a good home for plants and animals living in and near the water.
